Section I (Briefings and Reports on Operations)

Operational Briefing -- Satellite

25X1A

1. [redacted] reported satellite operations and scheduling as of 17 April 1969 as shown on the attached page.

25X1A

2. In reply to questions from the Chairman it appears that some further delays have been encountered in the work necessary to restore NRO confidence that UTB film may again be used in the CORONA program. [redacted] was also guarded in replying to a question as to the contribution of UTB to search problems.

25X1A

Report on Aircraft Activities -- Far East

25X1A

3. Continuing standdown of both IDEALIST/TACKLE and FOOD FAIR programs was confirmed. [redacted] then reported GIANT SCALE for the period 11-17 April as follows:

25X1A

<u>DATE</u>	<u>MISSION NO.</u>	<u>AREAS/TARGETS</u>	<u>RESULTS</u>
15 Apr	GS135	Cam Pha Port, Hon Gai Port, Kep Afld, Kep RR Yd, Phuc Yen Afld, Viet Tri RR Yd, Yen Bai, Dien Bien Phu	Fair

COMIREX-M-69
17 April 1969

25X1A

25X1A

5. [redacted] reported efforts to satisfy two priority South China/North Vietnam requirements as follows:

a. Specific targets pertinent to Coverage of Lines of Communications (LOC) most likely to be used for the introduction of Chinese forces into North Vietnam (see COMOR-D-25/207, 4 March 1966) are identified by underlining in Tab A. The number of LOC priority targets in South China and North Vietnam remains at 352. For the period 10-16 April 1969, surveillance coverage was reported on eight priority targets in North Vietnam.

b. Coverage of North Vietnam to detect the possible introduction or deployment of offensive missile systems (see COMOR-D-25/200, 23 May 1967, and COMIREX-D-25, 3/2, 20 November 1967) is shown on the grid map at Tab B for the period 3-9 April 1969. Two BUMPY ACTION missions flown during this time period and considered successful have not been reported. No SSM activity was observed.

Report on Aircraft Activities--Cuba

25X1A

6. [redacted] submitted the following report of GLASS LAMP coverage in the 9-17 April period:

25X1

<u>DATE</u>	<u>MISSION NO.</u>	<u>RESULTS</u>
9 Apr	G078	Successful, 6.5% coverage
11 Apr	G079	Successful, 21.7% coverage
12 Apr	G080	Successful, 14.1% coverage
16 Apr	G081	Unknown

GLASS LAMP ACTIVITIES

9 - 17 Apr 1969

RECAP

<u>DATE</u>	<u>MISSION NO.</u>	<u>NET</u>	<u>CUMULATIVE</u>
9 Apr	G078	6.5%	21.5%
11 Apr	G079	21.7%	35.8%
12 Apr	G080	14.1%	41.8%

25X1A

7. [redacted] invited COMIREX attention to the fact that GLASS LAMP appears to be encountering difficulty returning to the previous 90 percent coverage level. He then reported that for the 56-day period beginning 20 February 1969 eleven GLASS LAMP missions were flown over Cuba and provided 87 percent coverage of the area. During this period 165 of the 175 targets in Cuba were covered completely on cloud-free photography, not including the four most recent missions flown on 5, 9, 11, and 12 April.

Section III (Subcommittee and Working Group Reports)

(Note: Some material presented by Subcommittee and Working Group Chairmen at the time they are called on to make their reports is reported elsewhere in the Minutes, Action Items in Section IV for instance, and is not repeated in this section.)

Report from Mapping, Charting, and Geodesy Working Group

25X1A

1. [redacted] reported that his Working Group has been asked by [redacted] of the NRO to make a preliminary study of the possibility of the U. S. Army Topographic Command (TOPOCOM) servicing requests for copies [redacted] after initial processing. The Chairman remarked that this might be one way of cutting down on complaints about damage to imagery during processing. [redacted] said this could be true except that some of the damage occurred in initial processing. He indicated, however, that he thinks this problem has been taken care of with Eastman Kodak.

Installation Data File: Input of Third-Phase Exploitation Information
(COMIREX-D-32.4/3)

25X1

4. In his introduction of the question of inclusion of third-phase information in the Installation Data File, [redacted] reported that his Working Group had reached the general conclusion that a significant portion of the information included in phase three reports is not compatible with IDF computers, unless imagery is included. In this context, [redacted] observed that much of the detailed information he has in mind was processed out of a computer in the first place. The Chairman, DBWG, pointed to the "conclusions and recommendations" in paragraph 18 on page 9 and admitted that the recommendation that DBWG examine the question of the inclusion of graphics is an interim evasion of this issue. [redacted] requested, however, that COMIREX approve the other actions contained in the recommendations.

COMIREX-M-69
17 April 1969

25X1A

5. Following agreement to some editorial changes, requested by the Acting Army member, COMIREX approved the paper. /Revised paper distributed as COMIREX-D-32.4/3A, 25 April 1969./

Problems Encountered in Selecting Targets for High Level Drone Coverage of South China

25X1

6. The Acting Chairman, ICRS, reported that his Subcommittee had encountered some problems deciding whether, in planning drone coverage of South China, the 90 key targets should be given the same priority or if there should be an attempt to divide them into two priorities. [] then reported that he was hopeful a solution would be arrived at before the end of the week so that he could provide guidance to JRC via DIA. In response to a question from the Chairman, [] noted that the present requirements guidance seems adequate for exploitation purposes and he anticipates no problems in readout.

25X1A

25X1A

Review of Adequacy of Photographic Coverage of China as Related to the Need to Justify Manned Overflight

25X1

7. The Chairman referred to Minutes of the 11 March meeting of the 303 Committee with particular regard to the decision to delay consideration of U-2 reconnaissance and to require a strong intelligence justification at such time as another request might be submitted. [] observed that under the present circumstances, when it appears that U-2 coverage should be considered to satisfy approved intelligence requirements consistently left uncovered by satellites, the type of justification requested appears rather tough. U-2 sorties would probably be infrequent and the situation quite different, therefore, to a few years ago when missions were frequent and special justification was required following an "incident". The State Department member reported that he felt quite certain that such justifications would be required. The Chairman then suggested that, as a preliminary to forwarding another request for U-2 coverage, the community keep a careful record of coverage of priority targets achieved by satellites and drones for the next two or three months. This record might provide us with a valid basis for judging the need for U-2 missions to supplement satellite coverage.

25X1A

25X1D

Consideration of Need to Review or Revise Requirements for North Vietnam (COMIREX-M-67, page 16)

13. At the request of the Chairman, [Redacted] reviewed informally some of the problems which he believes COMIREX faces in any attempt to tackle the problem of the North Vietnam requirements at this point in time. In essence, [Redacted] felt that a rewrite of the requirements would be unrealistic. The present requirements are probably all valid even though they are never met in terms of outstanding demands for frequency of coverage. In this connection, Mr. Moyer noted that even in the period before the bombing standdown, when we presumably used all reconnaissance capabilities at our command, the requirements were never met in their entirety.

25X1A

25X1A

14. The Department of State member referred to the proliferation of requirements produced in the past months, two sets from COMIREX, plus the "bombing halt" and "truce" attack on the subject by CCPC. Mr. Moyer felt that in the perspective of these efforts, and taking into account the fact that [Redacted] had recommended that

25X1A

the requirements review be made without consideration of the deployment of additional assets, it seems questionable whether a new requirement paper would serve any useful purpose at this time. The Department of State member suggested that if a COMIREX analysis of coverage is needed at this juncture, it might be interesting to evaluate current performance against the situation existing before the bombing halt. Mr. Moyer cautioned however that the use of collection assets in this area will likely be controlled by the climate of the current political situation rather than by specific requirements statements. In conclusion, the Chairman summarized his preference as being the need to convey the message of the importance of low level tactical reconnaissance and suggested that perhaps we should try to confine our paper to that message.

political/military situation

Information Required for DBWG to Prepare Quarterly Resource Report

25X1A

15. [redacted] reported to the Chairman that he had not as yet received all the information necessary to produce the quarterly resource report. [redacted] requested members to give this their immediate attention. The Chairman added that his memory was that the Minutes (COMIREX-M-65, page 18, para 6) had been very specific in specifying continuing support to DBWG so that it could produce this report.

25X1

Support of Special Projects Office (Department of the Interior) at Reston

25X1A

16. [redacted] reported that MCGWG might be able to conclude on the Reston requirements at the meeting on 22 April. If this is accomplished, it may be possible to present a paper for COMIREX consideration on 1 May.
